

OnCast™ Desktop

Integrates your desktop to deliver the true potential of IP Telephony via enhanced interactive broadcasts.

With the OnCast family of products, users can easily realize the full potential of convergence. Use OnCast Desktop quick launch integration with existing calendars and address books to create content rich broadcasts that include useful documents, audio, real-time key word filtered RSS feeds as well as embedded live internet links.

OnCast Desktop Benefits:

- Quick launch broadcasts from your Microsoft Outlook or Lotus Notes address book and calendar
- Create content rich broadcasts that include useful documents, audio, real-time key word filtered RSS feeds as well as embedded live internet links
- Automate routine or recurring broadcasts
- Save complex scripted logic actions through powerful single click or one-button shortcuts
- Web-based interface for access to full capability broadcast message creation or system administration
- Build on-the-fly conference calls, send out group announcements
- Attach functions to phone buttons that direct participants to join the conversation and access documents or files
- Immediately broadcast live, company-wide announcements, or emergency alerts from a desktop or IP phone to the entire company, including standard or revised evacuation instructions and maps
- Configurable soft-keys for extended work-flow automation
- Multi-vendor IP-PBX support means better environment integration

Download a Free 45-day trial copy of OnCast Desktop that runs with your Cisco CallManager IP-PBX and IP devices at http://www.litescape.com/products/oncast_desktop.htm

Built on LiteScape's powerful Multi-modal Application Platform™ (MAP), OnCast allowing secure and scalable solutions for interactive broadcasts and collaborative messaging, specifically developed for reliable and capable delivery over your existing IP Telephony infrastructure and enterprise applications.
