

LiteScape

LiteScape helps our customers search and connect, communicate, and collaborate more efficiently

LiteScape Opportunity IS NOW!!!

Time to make the **Connection**

LiteScape

LiteScape Secure Profile Management (SPM)

SPM: Identity Management for Voice Over IP devices & applications:

- Increases security
- Provides personalization

Secure, authenticated & personalized access to:

- Multi-site Extension mobility & presence management
- Directories (corporate, personal, public)
- XML Applications
- Calls, conferences & broadcasts

Secure Profile Management (SPM)

Secure log-in to IP phones

SPM verification combines at least 2 of 3 identification factors:

- Biometrics: Who the user “Is”
- Password: What the user “Knows”
- Magnetic/RFID card: What the user “Has”

SPM Verification Method #1

- 1) User places finger on SPAR for verification
- 2) SPM pushes authentication screen to IP phone
- 3) User provides (inputs) user id and pass

SPM Verification Method #2

- 1) User swipes/shows ID (Magnetic/RFID, OPTIONAL)
- 2) Places finger on SPAR for verification
- 3) SPM pushes authentication screen to IP phone
- 4) User provides (inputs) user id and pass

Secure Profile Management (SPM): Identity Management for VOIP phones

- Establish presence and **multi-factor identity** at the edge of the network
- Enables users to securely log into to IP phones within the organization and access VOIP applications
- LiteScape SPAR (Secure Personal Authentication Reader) enables login using:
 - RFID and Bar-code
 - Bio-metrics (finger-print)
 - Magnetic cards

Secure Profile management ensures the right participants are attending the sessions after being verified and authenticated.

This is required in both highly secure environments or places where end-user personalized services are offered

SPM: Certified and deployed

- Product:
 - SPM certifications
 - JITC (Joint Interoperability Testing Command) certified as of Jan. 2008
 - IA (Information Assurance) Accreditation as of Jan. 2008
 - FIPS certified (3 year process) as of April 2009
 - Published as a DOD Approved Product List
 - Installed at multiple sites within the US Government:
 - US CENTCOM, DISA (VOSIP Implementation) and USAF
 - Tried at various Fed Gov & Retail sites
 - Showcased at various briefing centers
- Sales and distribution:
 - Distribution through government systems integrators and resellers
 - Established relationship and sponsorship from Cisco Federal team

SPM--Public Sector

- Hardened CyberData phone case with authentication device: BIO/RFID/MAG
- Identification of the user and unlock of the phone. Making a call on behalf of the user.
- Monitoring and tracking of the phone call
- Updating Account Balance and disconnect of the call once run out of money
