# Using the LiteScape Directory Tab in Cisco Jabber Client

The OnCast add-in for Cisco Jabber Client enables OnCast 'Search and Dial' functionality. The benefits of these features include the ability to access all configured Global Directories available to the user, instead of just their Cisco Jabber Contacts.

## Accessing the LiteScape Directory tab

To access the LiteScape Directory tab from Jabber Client.

1. **Start** Cisco Jabber Client on your PC.
2. **Select** the icon from the side bar. The LiteScape Directory tab appears.

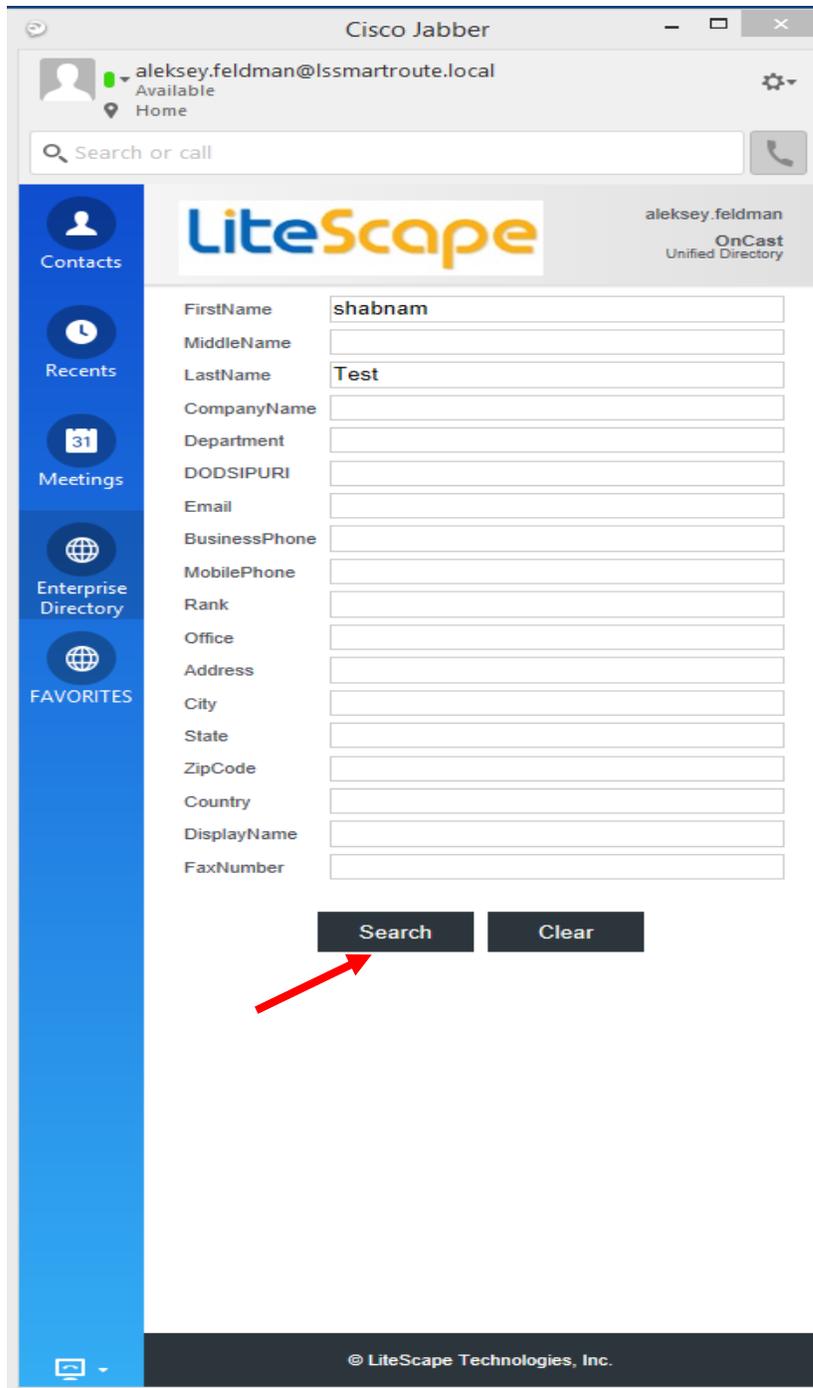

## Searching the Global Directory

Once you Login you can search directory servers that have been configured in OnCast Server that include employee and customer information.

To search the Global Directory:

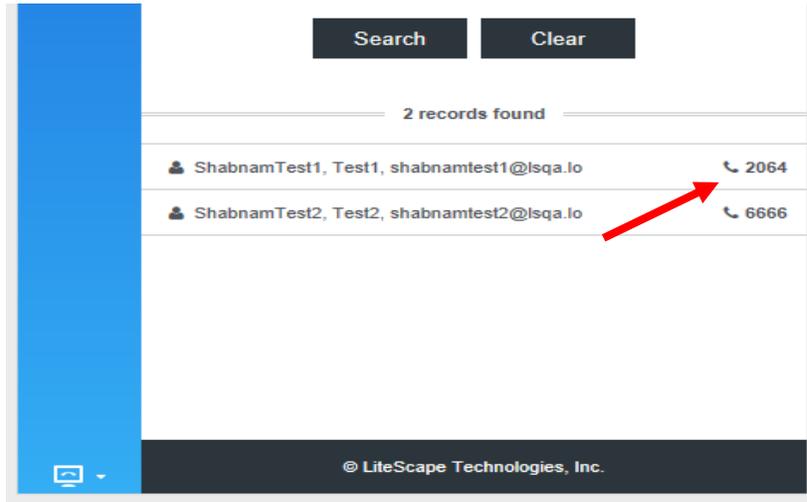

1. In the field you want to search (e.g. **First Name**), begin typing letters. NOTE: Search fields are customizable. Administrator can choose to add other fields to search or remove any of the default search criteria.
2. **Enter** the appropriate characters in the search criteria fields and select **Search**.

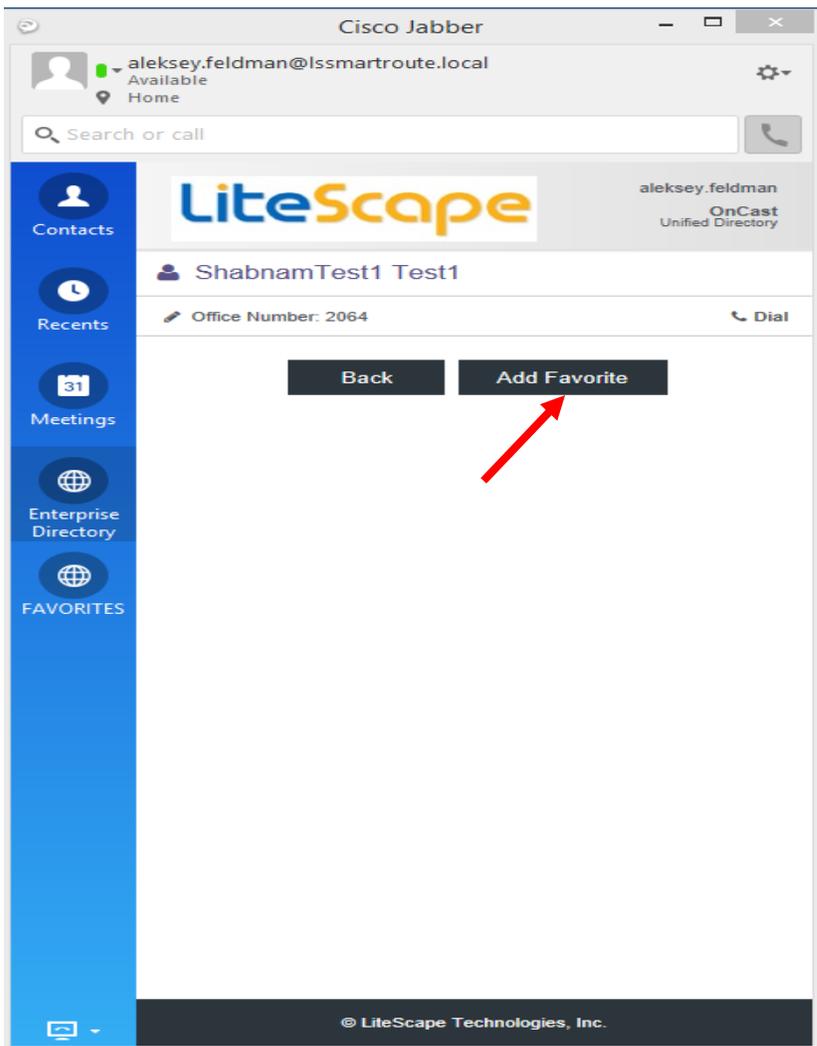

The screenshot shows the Cisco Jabber interface with the following elements:

- Window title: Cisco Jabber
- User profile: aleksey.feldman@lssmartroute.local, Available, Home
- Search bar: Search or call
- Navigation menu: Contacts, Recents, Meetings, Enterprise Directory, FAVORITES
- Search form fields:
  - FirstName: shabnam
  - MiddleName:
  - LastName: Test
  - CompanyName:
  - Department:
  - DODSIPURI:
  - Email:
  - BusinessPhone:
  - MobilePhone:
  - Rank:
  - Office:
  - Address:
  - City:
  - State:
  - ZipCode:
  - Country:
  - DisplayName:
  - FaxNumber:
- Buttons: Search, Clear
- Footer: © LiteScape Technologies, Inc.

You will see a list of search results and you can dial by pressing on phone number to the right:

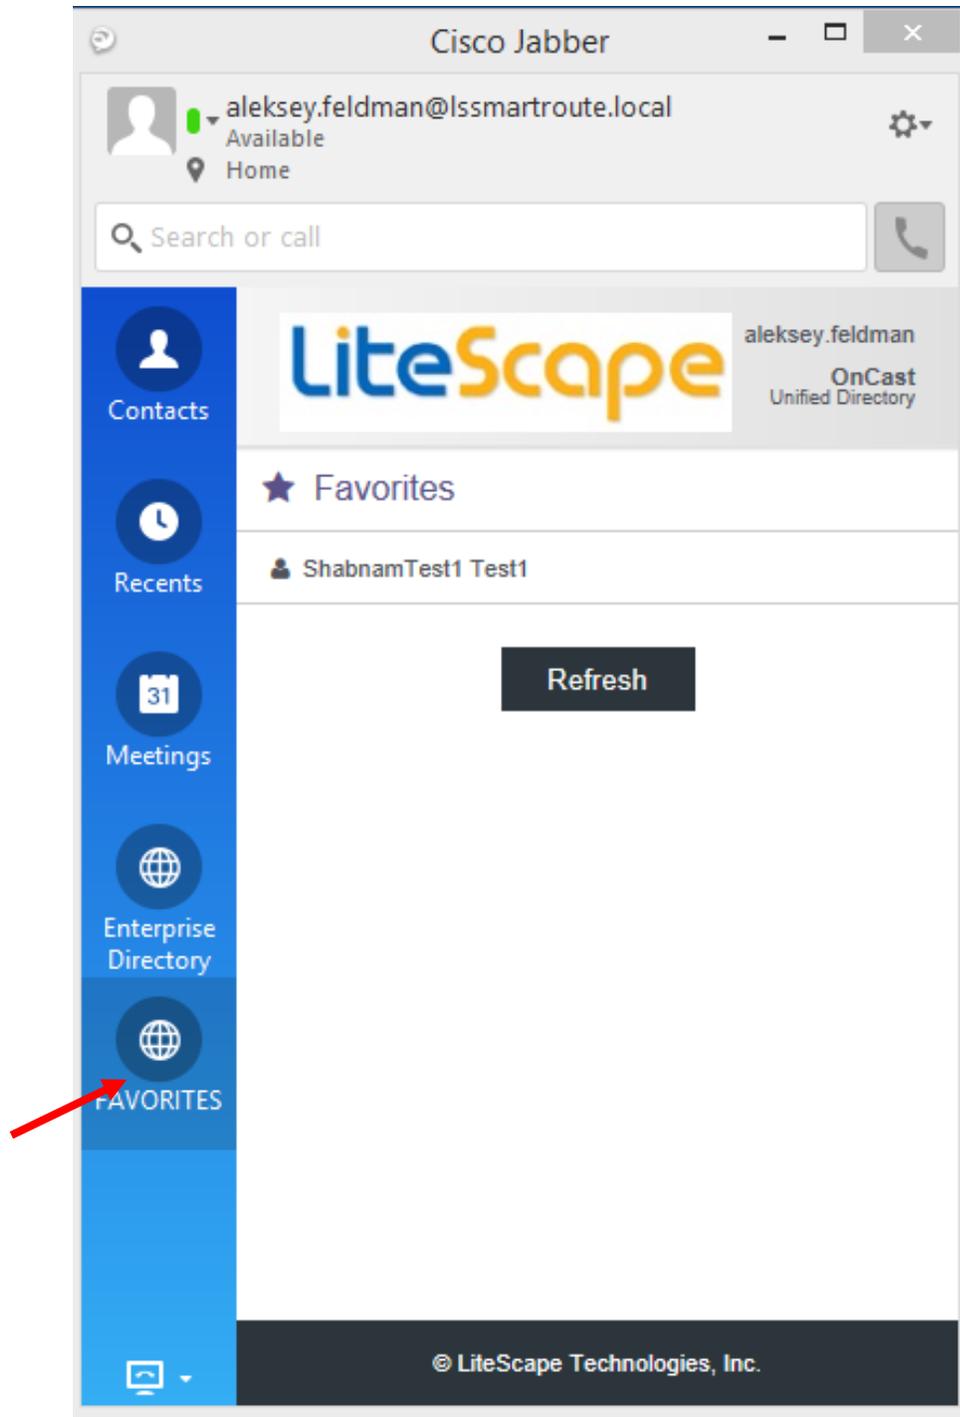

You can select the found contact and view the detail information (other telephone numbers) / add them to your Buddy list

## Accessing the Buddy List

Once you added the contact to favorites you have the option to access them without searching the directory for faster and easier access to the contacts that you connect more often.

1. **Select** the icon from the side bar. The Buddy List tab appears.
2. **Select** the Contact and click to dial

# How to Use OnCast Browser

Provides a web based OnCast search to your Global Address Book.

## Accessing Your OnCast Browser

The typical URL for accessing OnCast Web Client is <http://<IP-address-or-hostname>/browserdialer/search.aspx>

You will be redirected to the search page

When done click Search button. Search results will be listed below the search button.

The screenshot shows the LiteScape search interface. At the top left is the LiteScape logo. Below it are four input fields labeled "First Name", "Last Name", "Group Name", and "Phone". A "Search" button is positioned below the "Phone" field. Below the search button, the text "1 record(s) found" is displayed. Underneath, a search result is shown for "Samira Kashani, AD-P" with two phone numbers: "20365" and "4084805621". At the bottom of the search results area, there are links for "Home", "Options", and "Log Out", followed by the copyright notice "© LiteScape Technologies, Inc."

You can select the found contact and view the detail information (other telephone numbers)

The screenshot shows the LiteScape contact details page for Samira Kashani. At the top left is the LiteScape logo. Below it is the heading "Details - Samira Kashani". Underneath, there are two rows of contact information: "Mobile" with the number "914084805621" and "Office" with the number "20365". At the bottom of the details area, there are links for "Home", "Options", and "Log Out", followed by the copyright notice "© LiteScape Technologies, Inc."

## Using the LiteScape Directory from Phone

OnCast Phone allows you to perform the following actions:

1. **Access** your global address book from your phone
2. **Search** for users and groups based on various criteria
3. **Dial users** directly from your global address book

### Accessing OnCast Phone Features

To access the OnCast Phone features:

1. **Push** the directory button on your phone to display the directory menu

2. Use the up and down arrows on your phone to scroll through the directory options
3. Select Global Directory (You can adjust the name of your OnCast directory as it appears on the phone's **directories** option )

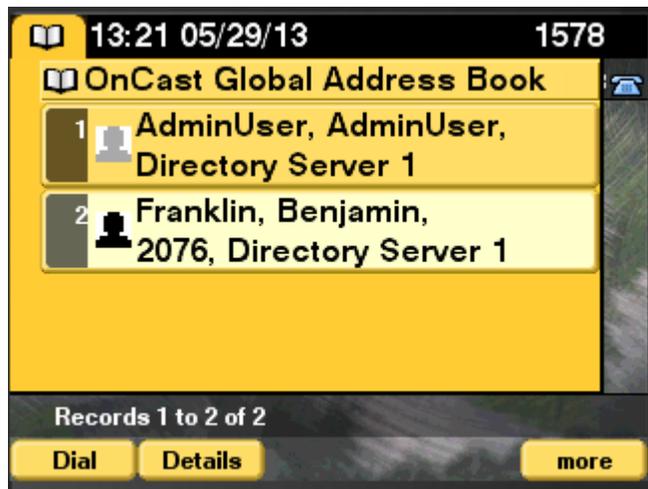

## Searching the Global Directory

To search the Global Directory:

1. In the field you want to search (e.g. **First Name**), begin typing letters. NOTE: Search fields are customizable. Administrator can choose to add other fields to search or remove any of the default search criteria.
2. Enter the appropriate characters in the search criteria fields and select **Search**.

You will see a list of search results

You can select the found contact and view the **detail** information or **dial**

**NOTE:** You can customize the fields you can search for (e.g. Department), edit/remove already configured field, move the position of your soft keys and change your directory name through OnCastDirectory WebAdmin
