LiteScape OnCast makes the future of unified communications a reality today, allowing organizations to harness the power of complete communications—voice, conferencing, broadcasting, collaboration—across the applications and Polycom communication devices they use on a daily basis.

OnCast increases productivity while decreasing hard dollar communications expenses. OnCast reduces the time it takes to collaborate and make informed decisions.

OnCast bridges the gap between corporate data, collaboration tools, desktop PCs, and *Polycom* IP phones to create a seamless communications experience. The power of OnCast lies in its ability to integrate *Skype for Business* with a range of critical business applications including Microsoft Active Directory, Microsoft Outlook/Exchange, IBM Lotus Notes, Salesforce.com, and WebEx.

Tearing down communications barriers, OnCast effectively eliminates the divide between *Polycom* IP phones and PCs, allowing users to move seamlessly between these distinct devices. By integrating the tasks users associate with their telephones with the functions they perform on their computers, OnCast allows users to collaborate more effectively than ever, increasing productivity and optimizing business processes.

OnCast consists of a number of different application services and user interfaces which, when combined, reduce the complications of

present-day communications into a single, integrated solution across multiple modes of communication.

OnCast Services

OnCast Unified Directory Services

OnCast Directory Services provide access to various types of corporate information systems including directory servers, email servers, and CRM systems from one single interface on a *Polycom* IP phone or a desktop client.

OnCast Directory Services enable users to simultaneously access all of their corporate directories and collaboration tools (e.g. WebEx) using flexible, intelligent search capabilites from their *Polycom* phone or PC to identify, locate, communicate, and collaborate with individuals or groups wherever they are located. Users have access to a range of directories, including:

- Microsoft Active Directory
- LDAP and Open LDAP compliant directories
- Microsoft Exchange and Outlook (GAL and PAB)
- IBM Lotus Notes
- Salesforce.com
- SQL-based directory repositories

systems. Through the push of a button on a *Polycom* IP phone or the click of a mouse on a PC, OnCast Communication Services enable users to instantly dial or conference with individuals or groups.

OnCast Collaboration Services

OnCast Collaboration Services eliminate the complexities of online collaboration and allow users to communicate and share information more efficiently than ever before.
Through an exclusive partnership with WebEx, OnCast tightly integrates *Skype for Business* and Polycom IP phones with WebEx collaboration tools.

OnCast allows users to seamlessly move between the interface (*Microsoft Outlook, Lotus Notes, Internet Explorer or OnCast Smart Client*) and device (*Polycom* IP phone or PC) of their choice in order to schedule, launch and join WebEx collaboration sessions with one touch.

Search multiple corporate directories at the same time from one interface.

Search Results coming from LDAP directories

OnCast Communications Services

OnCast Communications Services provide connectivity to *Skype for Business* to greatly simplify and enhance how users leverage the capabilities inherent in these

About LiteScape

LiteScape Technologies is a leading software developer of Unified Communications applications. LiteScape's solutions provide unified access to traditionally disparate business applications, collaboration tools, and communications devices to increase productivity and optimize business processes. Founded in 2004, the company is privately held and based in San Francisco, CA. For additional information, please visit www.litescape.com or email info@litescape.com.
