

## Increase Revenue Capture and Improve Productivity on all Client-Related Calls.

LiteScope CallTrack PRO allows legal and professional services firms to automatically associate client-matter and project codes to inbound and outbound phone calls. Users can easily assign calls to appropriate codes by utilizing simple menus from their phones--and with client/matter code learn features--CallTrack PRO automatically associates codes to regularly dialed or received calls so you don't have to. When CallTrack PRO is combined with LiteScope OnCast, users can associate calls to client/matter codes from call context screen pops on their PCs, as well as record billable time--all without ever having to turn to their phone to answer or place calls or put pen to paper to record information about the call. Save money on manual call reconciliation; substantially increase revenue capture; and maximize use of high-value people resources, all through an enhanced user experience provided by CallTrack PRO.

### Key Features & Benefits

**Automatically Assign Client-Matter & Project Codes to Calls**  
Precisely track, capture, and assign client calls for improved billing accuracy

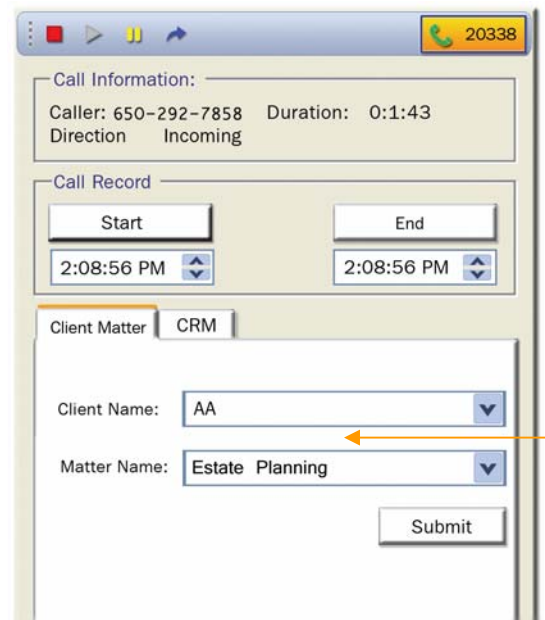

**Leverage Client-Matter Code Learn Features**  
Automatically associate learned numbers to client-matter codes

**Integrate Seamlessly with Third-Party Accounting Applications**  
Integrate with accounting applications (Equitrac, @comm, ISI) and CRM applications (Elite, Salesforce.com) to ensure accurate billing

**Use Comprehensive Reporting**  
Eliminate costly and inaccurate call logbook reconciliation.

**Work Smarter, Not Harder**  
Utilize comprehensive, accurate, and customizable call reports for audit trails.

**Client Matter History**  
Attorneys and Paralegals can assign client matters to incoming and outgoing calls at a later time though the call history interface

Save Time with CallTrack PRO's Learn Feature: CallTrack PRO Remembers the Client-Matter Code You Entered Last
